DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/11/2006 has been entered.

Response to Arguments

2. Applicant's amendment and argument, filed 09/11/2006, with respect to the prior art rejection have been fully considered and are persuasive. The 35 U.S.C §102 rejection of claims 1-20 has been withdrawn.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. David Zibelli (Reg. No. 36,394) on 12/15/2006. Examiner pointed out the claim dependency errors in claims 3, 4, 7 and 9 submitted on 09/11/2006. They should depend on claim 1 instead of cancelled claim 2. Mr. Zibelli agreed to changes via Examiner's Amendment.

4. The application has been amended as follows:

- In line 1 of claims 3,4,7 and 9, replace "Claim 2" with -Claim 1-.

Allowable Subject Matter

5. Claims 1 and 3-20 are allowed.

The following is the statement of reasons for the indication of allowable subject matter:

The prior art disclosed by the applicant and cited by the Examiner fail to teach or suggest, alone or in combination, ***all*** the limitations of the independent claim(s) (claims 1 and 16), particularly having a plurality of cache units coupled on one end to a channel unit and on another end to a control unit, wherein the interconnection paths between the units are completely separate and independent with no overlaps. Furthermore, there is a separate processor for controlling the channel unit and the control unit data transfers to the cache.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patents and patent related publications are cited in the Notice of References Cited (Form PTO-892) attached to this action to further show the state of the art with respect to structure of channel, control, cache units and their respective interconnection paths.

US Pat. No. 5,369,751 to Kambayashi discloses a channel unit (element 3) connected to a cache unit (element 41) and the cache unit connected to control units (element 45) using independent paths. However, Kambayashi does not disclose a plurality of cache units and their respective paths to the control and channel unit.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alan S. Chen whose telephone number is 571-272-4143. The examiner can normally be reached on M-F 8:30am - 5:30pm.
